

# DTLT

HCC 410 | DTLT@UMW.EDU | UMWDTLT.COM

## OUR MISSION

UMW's Division of Teaching and Learning Technologies is a group of creative, reflective educators and technologists who foster community around and drive advances in teaching, learning, and research, by developing pedagogical partnerships with faculty and academic units.

## PEDAGOGICAL APPROACHES

Let's brainstorm approaches to teaching with technology to hone your teaching philosophies for in-person, online, and hybrid environments.

## WORKSHOPPING SYLLABI

We can collaborate on how you structure your course and ways to integrate digital and analog tools into your approach.

## DIGITAL PROJECT DESIGN

Starting a new research project? Creating or remixing an assignment? We can help strategize and identify potential partners.

## INNOVATIVE ASSESSMENT

Already doing a creative digital project? We help faculty think through non-traditional assessment strategies.

## CONSULTING

DTLT's main role is to collaborate with faculty and academic units on developing projects, courses, and programs that integrate technology in creative, ethical ways. Contact us by e-mail at [dtlt@umw.edu](mailto:dtlt@umw.edu) to set up an appointment to consult with us!

## DOMAIN SUPPORT

We help faculty get signed up on Domain of One's Own! We also offer faculty development in Wordpress and other learning environments for the web.

## DOCUMENTATION

We offer resources on tools you're already using, like Canvas or WordPress. We also blog regularly about digital pedagogy.

## TOOL EVALUTION

Looking for a new tool? We can introduce you to various platforms, help evaluate them, and experiment with you.

## CLASS VISITS

We offer a variety of introductory class visits to help acclimate you and your students to new tools and platforms.
